

Telescopic Excavator Digging House For Long Reach Customized Service

Our Product Introduction

for more products please visit us on excavatorlongarm.com

Basic Information

- Place of Origin: Guangdong China
- Brand Name: Zhonghe Machinery
- Certification: CE, patent, ISO
- Model Number: HB0012
- Minimum Order Quantity: 1 set / piece
- Price: USD 176.00-USD5799.00
- Packaging Details: bubble, wooden case
- Delivery Time: 5-35/works
- Payment Terms: T/T, L/C
- Supply Ability: 10 sets per week

Product Specification

- Features: Long Reach, Digging Hard Sand, Easy Transportation
- Warranty: 6 Months For Sliding Arm, 3 Months For Bucket
- Bucket Capacity: 0.1 Cbm - 2cbm
- Apply To: 3 Ton - 55 Ton
- Condition: New
- Material: Shaogang Q355B
- Suitable Working Conditions: Digging House Foundation
- Digging Depth: 4m, 8m, 10m, 12m
- Highlight: Long Reach Telescopic Excavator, Customized Service Telescopic Excavator, Digging House Telescopic Excavator

Product Description

Excavator Telescopic with Standard Bucket 12m Digging Depth Long Reach

Brief Introduction to Long Boom Excavator for Sale

The telescopic arm of the excavator is specifically designed for digging in confined areas, including basements and foundation pits. Its functionality relies on the extension and retraction of a long cylinder, allowing for efficient operation in restricted environments.

Suitable working condition of one set of excavator telescopic arm

* Digging House Foundation *Digging Sand Soil Silt Gravel

Cut from one plate

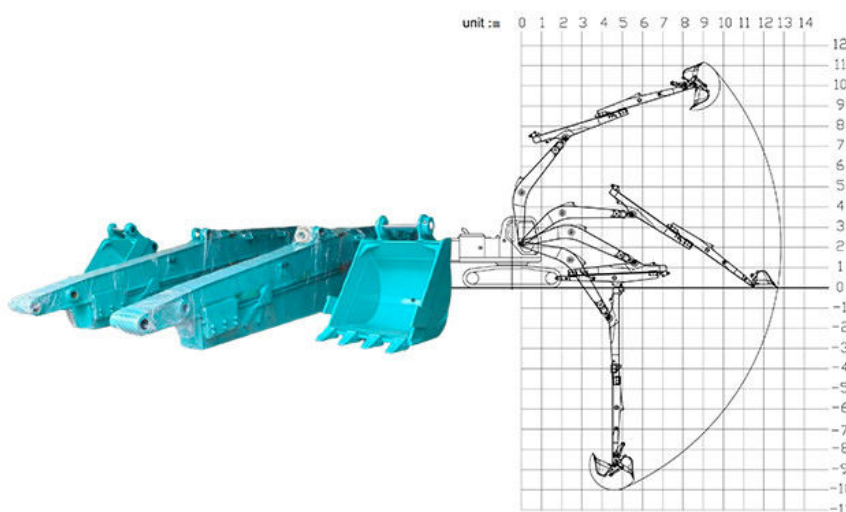

stronger

avoid deformation

Welded together

easy to crack

Specifications of excavator telescopic arm:

Excavator model(ton)	bucket capacity (cbm)	Maximum Digging Depth(m)
3-4 ton	0.1 cbm	4m
6-8 ton	0.2 cbm	6m
10-12 ton	0.35cbm	8m
20-27 ton	0.5 cbm	10m
30-36 ton	0.6 cbm	12m
45ton-50ton	1.2cbm	12m

Welcome to send your excavator model to us for double check. Whatsapp [+86 13822325403](https://wa.me/8613822325403)

Some Production Process of excavator sliding boom:

- * Panel steel is cut by CNC plasma machine with less deformation. Every steel plate is stored in a very clean, dry warehouse which can prevent the steel from moist, wet etc.
- * Precision of production process. Large floor-standing double-sided boring machine ensure machining precision of no less than 0.05mm. The excavator sliding arm on the excavators will be suitable.
- * After welding, will conduct flaw detection on each welding bead. This is one of our must-do processes to ensure that the weld meets the standards, detect whether there are false welds, and whether there are pores, so as to ensure the firmness of the weld. Every staffs have full experience in welding and test. The chef of company will check the quality on every step of production.

Full Tests---Every Procedure is under strict supervision 每道工序都是在严格监督下进行

Assembly inspection 安装检测

Weld flaw detection

Make sure premium welding and not easy cracking

焊道探伤检测--确保优质的焊道和不容易开裂

Regular Testing 常规检测
