Details of our **Excavator Long Reach Telescopic Boom:**

1.2 Details of Three-section telescopic arm

三段式伸缩臂细节

The external hose pulley separates the hose from the wire rope, avoids the friction between the wire rope and the hose, reduces failures, and makes maintenance more convenient

Centralized lubrication system --easy for later maintenance

Stop valve - easy to replace attachments lessen oil leakage

Double oil seal design prevents hydraulic oil from leaking, prolongs the service life of the cylinder

Clamshell bucket adopts double cylinders---less failure rate easy maintenance, not easy leak oil

Materials of one set Excavator Long Reach Telescopic Boom:

Premium Wire Rope

Xianyang Baoshi Rotary wire rope--can bear larger tension and impact

Multi-strand Wire Rope

The inner core of the wire rope is a steel core, which has higher tensile strength.

High-speed Heavy-load Bearings

The bearings are high-speed heavy-load bearings, and the bearings use larger diameters to withstand greater loads.

MC Steel

The pulley is made of MC steel, which has the same hardness as steel, but is light and wear-resistant. The wheel diameter is enlarged to withstand greater loads.
