

## 24M 26M Long Reach Excavator Reach for Cat Hitachi Komatsu Sany

Our Product Introduction

for more products please visit us on [excavatorlongarm.com](http://excavatorlongarm.com)

### Basic Information

- Place of Origin: Guangdong Province, China
- Brand Name: Kaiping Zhonghe Machinery Manufacturing Co. Ltd
- Certification: CE, patent, ISO
- Model Number: Long Boom Arm Excavator 001
- Minimum Order Quantity: 1 set / piece
- Price: USD 199.00-USD9999.00
- Packaging Details: bubble / wooden cases
- Delivery Time: 5-25/works
- Payment Terms: T/T, L/C
- Supply Ability: 6 sets per week

### Product Specification

- Color: Red, Yellow, Blue, According To Clients' Requirement
- Material: Q355B, Q355NE, Q690D
- High Pressure Hoses: Available
- Suitable Excavators: 6 Ton To 55ton
- Bucket: 0.45cbm 1.2cbm 2cbm 4cbm
- Manufacturer: Yes
- Length: 10m 20m 24m 26m 30m 32m
- Heavy Duty: Yes

## Product Description

### Heavy Duty Long Reach Boom Excavator with Bucket

#### Introducing the Long Reach Boom for Excavators

We are excited to introduce our Long Reach Boom, an advanced attachment designed to enhance the capabilities of excavators in various applications, particularly in construction, demolition, and environmental projects.

#### Innovative Design

The Long Reach Boom features an ergonomic design that maximizes reach and efficiency. Its elongated structure allows operators to access hard-to-reach areas without repositioning the excavator, making it ideal for tasks such as dredging, trenching, and material handling.

#### High-Quality Manufacturing

Our Long Reach Boom is manufactured using high-strength materials, such as premium-grade steel and alloy composites. These materials are selected for their durability and resistance to wear, ensuring a long service life even under heavy usage. The manufacturing process employs advanced techniques, including precision welding and machining, to guarantee structural integrity and reliability.

#### Rigorous Testing Standards

Before reaching the market, every Long Reach Boom undergoes extensive testing to meet stringent quality and safety standards. This includes load testing and fatigue analysis to ensure that the boom can withstand the stresses of demanding excavation tasks. Our commitment to quality ensures that operators can rely on our products for safe and efficient performance.

#### Enhanced Compatibility

Designed for easy integration, our Long Reach Boom is compatible with various excavator models. The quick-connect system allows for swift attachment and detachment, minimizing downtime and maximizing productivity on the job site. This versatility makes it a valuable asset for contractors and operators looking to enhance their equipment's capabilities.

#### Conclusion

With our Long Reach Boom, you can elevate your excavator's performance and tackle projects with greater efficiency and precision. Experience the benefits of advanced design and quality manufacturing that set our product apart in the marketplace. Contact us today to learn more about how the Long Reach Boom can transform your excavation operations!

More details of one set of long reach boom excavator:

## 1.2 Details of Excavator Long Arm

① The sleeves--steel sleeve & Graphite Alloy Copper Sleeve (more resistant)

② Customized & Thickened Connectors  
Premium Ningbo Connectors  
Can bear huge stress  
No Oil Leakage

③ Seamless Pipelines

\* High quality sleeves which is wear resistant.

Graphite alloy copper sleeve as the sleeve of boom end which is wear resistant than other sleeves

\*Better connectors.

Thickened and Enhanced connectors which can bear huge stress and not easy oil leakage

\* High precision Proceeding

Large floor-standing double-sided boring machine ensure machining precision of no less than 0.05mm

By proceeding with large floor-standing double-sided boring machine, long reach boom excavator will be suitable installed on the excavator.

## Double-sided boring lathe

After the excavator boom and arm are assembled, the pins on the boom are drilled to ensure that the pins on the boom are parallel to each other and the cross section of the pin hole is perpendicular to the pin. The double-sided boring machine of the boom makes the hole position more accurate and the quality higher.

Make sure the cross section of the pin hole is perpendicular to the shaft.

Make sure the axis is parallel to the axis

Make sure the cross section of the pin hole is perpendicular to the shaft

Make sure the axis is parallel to the axis

Feedback of excavator long reach arm from clients:

\* High efficiency \*Work smoothly \*Low fail rate

**Contact Details:**

Kaiping Zhonghe Machinery is a big Manufacturer of Excavator Arms and Booms

Key word: long reach boom excavator, pile arm pile boom, demolition arm, shorten arm/ tunnel arm, rock arm rock boom, telescopic arm, etc
