Product Description

BS900E Q690D Excavator Telescopic Boom Arm

Brief introduction of one set of Kaiping Zhonghe Machinery's telescopic dipper for excavator

A telescopic boom arm is a versatile piece of equipment commonly used in construction, maintenance, and aerial work. Its design allows for extended reach and maneuverability, making it ideal for accessing hard-to-reach areas. Typically mounted on excavators, the boom can extend and retract, providing flexibility in various applications, from lifting heavy materials to adjusting cameras. The boom arm is equipped with a hydraulic system that ensures smooth operation and precise control, enhancing safety and efficiency on the job site. Its compact design allows for easy transport and storage, making it an essential tool in many industries.

Material of excavator telescopic boom arm: BS900E , or others as you request, lighter and stronger material can lessen the load of the excavator, work more efficient, and with longer life-span.

Connectors of telescopic boom arm: Enhanced Thickened Connectors, not easy oil leakage, no easy breaking

Wire Rope of one set of telescopic boom arm: Using high quality wire rope, multiple-strand wire rope, with longer service life-span.

Pipeline of telescopic boom arm: Seamless Pipeline, which can bear huge stress and not easy breaking

Cylinders of telescopic boom arm: High quality cylinders from famous brand
