Product Description

Excavator Tunnel Arm (Tunnel Boom) – Precision and Power for Underground Work

The Excavator Tunnel Arm (Tunnel Boom) is a specialized attachment designed for confined and underground excavation projects, such as tunneling, metro construction, and utility installations. Engineered for maximum maneuverability in tight spaces, this robust arm features a compact design with reduced swing radius while maintaining high digging force and reach.

Key Features of One Set of Excavator Tunnel Arm Tunnel Boom:

Low-Profile Design: Optimized for narrow tunnels and restricted environments.

Reinforced Structure: High-strength steel construction ensures durability under heavy loads.

Enhanced Precision: Improved control for accurate digging, grading, and material handling.

Compatibility: Fits major excavator brands (e.g., CAT, Komatsu, Hitachi, Kobelco etc) with customizable mounting options.

Versatility: Ideal for urban infrastructure, mining, and civil engineering projects.
