

Excavator Rock Breaker Boom – High-Performance & Long-Lasting

Our Product Introduction

for more products please visit us on excavatorlongarm.com

Basic Information

- Place of Origin: China Guangdong
- Brand Name: Kaiping Zhonghe Machinery
- Certification: CE, Patents, ISO
- Model Number: YSB001
- Minimum Order Quantity: 1 set / piece
- Price: USD 100-USD19900
- Packaging Details: bubble
- Delivery Time: 7-30/works
- Payment Terms: T/T, L/C
- Supply Ability: 7 sets per week

Product Specification

- Apply To: 45ton - 55 Ton Excavator
- Working Condition: Breaking Rocks
- Cylinders: Enlarge Cylinders
- Material: Premium Q355B
- Condition: New
- Warranty: 6 Months
- OEM/ODM: Yes
- High Efficiency: Yes
- Highlight: Excavator rock breaker boom,
High-performance excavator rock arm,
Long-lasting excavator breaker boom

Product Description

Excavator Rock Arm Rock Boom Excavator Ripper Heavy Duty

Description of Excavator Ripper Rock Arm Rock Boom:

The excavator rock arm is commonly used for breaking through hard rock and dense soil. Its design is significantly more robust than that of a standard arm or boom, making it considerably heavier. At the front, the excavator rock arm rock boom features a ripper attachment, equipped with durable teeth that excel at tearing through tough sand, soil, and rock. Overall, this design is particularly well-suited for excavation tasks.

Specifications of one set of Excavator Ripper:

Suitable Excavator model(ton)	45-55 ton
big boom	9700 kgs
small arm	7600kgs
stick cylinder	140
bucket cylinder	150
ripper	2030 kgs

One set of excavator rock arm rock boom include: one big boom, one small arm, one stick cylinder, one bucket cylinder, one ripper, pins, D11 bucket teeth, bucket adapters.

Product Description

Bucket cylinder is inverted

It effectively avoids damage to the piston rod caused by possible collisions during excavation, reduces use risks and saves maintenance costs.

Powerful Cylinders

Made of special designed sealing structure, strong power with long durability. stick cylinder has a piston rod of 140mm. It has large flow, high strength and stronger power.

High quality

The metal hydraulic pipeline adopts pickling and phosphating process to avoid impurities and rust, and protect the main pump from damage. The hydraulic hose is a Continental brand with high reliability.

Cylinder through-pin design

The process requirements are higher, the concentricity is higher, the wear is reduced, the life is longer and more durable.

Strong digging force.

The digging force is stronger, the operation is easier and the efficiency is higher. Single-sided pipeline design: The pipeline is visible during operation, effectively avoiding the risk of collision, reducing the risk of use, and saving maintenance costs.

Wear-resistant ripper teeth

The ripper has a protective device to prevent stones from hitting the cylinder, and its plate is very thick with strong reinforcement plates. We use Diamond brand D11 ripper teeth, the tooth seat is more wear-resistant and not easy to break.

Introduction details of One Set of Excavator Ripper Excavator Rock Arm Rock Boom

Established in 2018, Kaiping Zhonghe Machinery is a combination of manufacturing and trading. Our products, including excavator long reach booms, demolition arms, 2-3 sections telescopic arms, tunnel arms, standard/rock buckets, grapples, and rippers, have been selling well in more than 40 countries and areas.

We are located in Guangdong Province, China. A 18000 m² 50 welding workers with over 7 years experience, 30 senior designers, and a high-tech R&D team (10+ years on customization, 100+ technical patents), strict production system (6+ years quality control and cost control) and warm-hearted service team. Our annual output of various types of excavator boom arms can reach up to 600 sets.

We strive to uphold our core principles of "Merit Quality, Sincerity Management, and Customer Satisfaction".
