

Adjustable Long Reach Arm for Excavator Boom Arm Experts

Our Product Introduction

for more products please visit us on excavatorlongarm.com

Basic Information

- Place of Origin: Guangdong Province, China
- Brand Name: Kaiping Zhonghe Machinery Manufacturing Co. Ltd
- Certification: CE, Patents, ISO
- Model Number: JCB0035
- Minimum Order Quantity: 1 set / piece
- Price: USD 3000.00-USD80000.00 EXW price
- Packaging Details: Bubble / wooden cases / or others as you request
- Delivery Time: 5-20/works
- Payment Terms: T/T, L/C
- Supply Ability: 5 sets per week

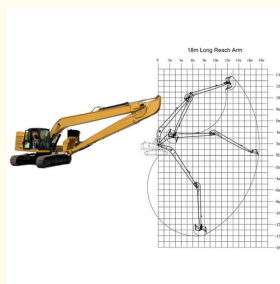

Product Specification

- Apply To: Demolition Work, Dredging, Construction Work
- Material: Q355B Or Q690D Or As You Request
- Excavator Brands: Hitachi Komatsu Sany Zoomlion Cat Etc
- Excavator Model: 6Ton - 200Ton
- Color: Red, Yellow, Blue White Customized
- Front Attachments: Bucket Shear Breaker Clamshell Bucket Etc
- Length: 15m - 35m
- Bucket Capacity: 0.4m3, 0.6m3, 1.5m3, 2m3, 2.2m3
- Highlight: adjustable excavator long reach arm, excavator boom arm with warranty, long reach excavator boom extension

Key Features of One Set of Excavator Long Boom Arm for Sale:

Superior Reach and Depth: Achieve an impressive reach of up to 30 meters (100 feet), allowing for deeper digging and extended outreach in hard-to-access locations.

Heavy-Duty Construction: Built from high-strength, wear-resistant steel, our long arm is engineered to withstand heavy loads and harsh conditions, ensuring longevity and reliability.

Efficient Hydraulic System: Designed to optimize hydraulic flow and pressure, long excavator boom enhances the performance of your excavator, allowing for swift and precise movements during operations.

Versatile Functionality: Perfect for a wide range of applications, including deep trenching, dredging, demolition, and site preparation. Its adaptability makes it an essential tool for contractors and operators.

Safety Features: Equipped with advanced stability controls and overload protection systems to ensure safe operation, reducing the risk of accidents on the job site.

Seamless Installation: Long Boom Arm Excavator comes with all necessary installation components, allowing for quick and easy mounting on various excavator models.

Why chose our Long Boom Arm Excavator?

Front end design of arm

Ours

The side panel at the front end of our arm is thickened. The force at this position is relatively large, so thickening of this position is very necessary.

Others

Other manufacturers do not thicken this position.

VS

Design of the rear seat plate of the arm

Ours

Our plate is thickened because this position is connected to the boom cylinder and is the most stressed part of the arm, so we thicken the plate to avoid cracking at this position.

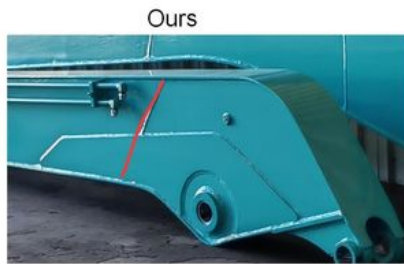

Others

Other manufacturers do not reinforce and thicken this location. After the excavator has been working for a long time, this location is prone to quality problems.

VS

Design of arm side panel

The thick plate and thin plate of our arm side plate are directly connected by diagonal connection. This design can effectively avoid excessive stress concentration and cracking at the interface.

VS

Other manufacturers use straight-line docking at this location, which is not reasonable enough, with excessively concentrated stress and prone to cracking.

Butt joint design of arm upper cover

The upper cover of our arm is generally not butt-jointed. Even if it is butt-jointed, we will stick a butt-jointed plate inside the cover to ensure that the welding can be fully melted. Our butt-jointed position is generally selected in the middle of the ear seat, so that there will be no problems.

VS

Other manufacturers dock at other locations, which may cause cracking at the docking interface later.

Q&A of One Set of Long Reach Arm for Excavator:

Q: What advantages does a long arm provide?

A: A long arm long boom for excavator allows for greater reach and depth, enabling you to tackle a broader range of projects efficiently and effectively.

Q: Is the long arm easy to install on my excavator?

A: Yes! Long boom arm excavator is designed for easy installation and comes with all necessary components for a hassle-free setup.

Q: Can I use different attachments with the long arm?

A: Yes, excavator long arm long boom is compatible with various attachments, allowing you to customize your excavator for specific tasks.

Q: How can I ensure the longevity of the long arm?

A: Regular maintenance, including lubrication, inspections, and prompt repairs, will help extend the life of your long arm and keep it performing optimally.

Q: What types of projects is this long arm best suited for?

A: Long reach boom arm for excavator is ideal for deep excavation, dredging, demolition, and any project requiring extended reach and precision.

Q: Can I get support if I have questions about my long arm?

A: Absolutely! Our customer support team is available to assist you with any questions or concerns regarding installation, maintenance, or operation.
