

China Excavator Telescopic Boom - Best Arm for Heavy Duty

Our Product Introduction

for more products please visit us on excavatorlongarm.com

Basic Information

- Place of Origin: Guangdong Province, China
- Brand Name: Kaiping Zhonghe Machinery Manufacturing Co. Ltd
- Certification: CE, Patent, ISO
- Model Number: SSB0018
- Minimum Order Quantity: 1 set / piece
- Price: USD 199.00-USD8999.00
- Packaging Details: Bubble / wooden cases / or others as you request
- Delivery Time: 5-20/works
- Payment Terms: T/T, L/C
- Supply Ability: 5 sets per week

Product Specification

- Technical Support: YES
- Warranty: 6 Months
- Suitable Excavators: Hitachi Komatsu Sany Zoomlion Cat Etc
- Excavator Models: PC300, CAT320, SY500HD Etc
- Wire Rope: Premium
- Key Words: Excavator Telescopic Arm
- Highlight: **China excavator telescopic boom, telescopic dipper arm heavy duty, excavator boom arm with warranty**

Product Description

Discover the versatility and efficiency of our excavator telescopic arm, designed for heavy-duty applications across various industries. This innovative solution is perfect for contractors looking to enhance their excavation capabilities, offering superior performance in both urban and rural environments.

Key Features of One Set of Excavator Telescopic Dipper Arm:

Extended Reach: Our excavator Long Reach Telescopic Boom provides exceptional depth and reach, making it suitable for deep excavation tasks and challenging terrains.

Robust Design: Constructed from high-strength materials, the excavator section telescopic arm ensures durability and reliability, even under the most demanding conditions.

Clamshell Bucket Option: The excavator clamshell telescopic arm configuration allows for efficient material handling, enabling operators to easily grasp and lift loose materials such as soil, sand, and gravel.

Adjustable Length: This telescopic arm for excavator features adjustable lengths, ensuring versatility for various applications construction work.

Precision Engineering: Manufactured with advanced technology, our Excavator Telescopic Boom Telescopic Arm guarantees accuracy and high performance in every operation.

Advantages of Our Telescopic Arm for Excavator:

Enhanced Productivity: The combination of a telescopic design and clamshell bucket significantly reduces cycle times, allowing for faster project completion.

Versatile Applications: Ideal for construction, our telescopic excavator is the perfect tool for any job requiring extended reach and precision.

Quality Assurance: Each unit is rigorously tested to meet industry standards, providing you with a reliable and efficient tool in your fleet.

Four pulley design

There are two sliding wheels on the top and two on the bottom, which separate the high-pressure hose and the wire rope to reduce mutual wear. Less wear can extend the service life.

Adopt 30mm main rope

We use thicker wire ropes, which can withstand greater tension, are not easy to break, and withstand greater pressure. The wire ropes are highly wear-resistant and have a long service life.

26mm auxiliary wire rope

Here is the auxiliary wire rope, which is used to make the telescopic arm retractable when it is extended horizontally.

Ningbo connector

It is made of metal and has high compression resistance and expansion capacity. It is easy to load and unload, and can be loaded and unloaded freely.

High Quality----Nylon Sliders

Siding block, it is nylon material, it can reduce grinding. Our sliding wheel is POM Material, with high mechanical strength and rigidity.

lubrication concentrate system

Many holes, many holes on the top and at the side, it is easy and convenient for the operator to refill the lubrication oil, they all concentrate on the front of arm.

Digging Depth(m)	Excavator Model(ton)	Clamshell Bucket(cbm)	Counterweight(ton)
12	20-25T	0.6	0
14		0.4	0
16		0.4	0

18		0.4	2
20	26-28	0.6	3

	35-38T		
25m	30-33T	2.2	3T
	35-38T		0
	35-38T	2.2	6T
	40-50T		0
26-30m	36-50T	1.5	5T
		1.5	
		2	
		2	6T
		2.2	
		2.2	7T
31-32m	40-50T	2.2	7.2T
		2.5	7.2T

Q&A for Excavator Telescopic Arm with Clamshell Bucket

Q1: What is the maximum reach of the excavator telescopic arm?

A1: Our telescopic arm allows for extended reach, making it ideal for deep excavation tasks in various environments.

Q2: Is the clamshell bucket included with the telescopic arm?

A2: Yes, the clamshell bucket is available as part of the excavator clamshell telescopic arm configuration, enhancing material handling capabilities.

Q3: Can this arm be used with a Hitachi excavator?

A3: Yes, our telescopic arm is compatible with various excavator models, including Hitachi, but please check specific compatibility with your model.

Q4: How do I purchase this telescopic arm?

A4: Our telescopic arm for sale can be ordered directly through our website or by contacting our sales team for assistance.

Q5: What types of projects can benefit from this telescopic arm?

A5: This arm is ideal for a wide range of projects, including construction, mining, and dredging, particularly in environments requiring deep reach.

Q6: What materials are used in the construction of the arm?

A6: The arm is made from high-quality, high-strength steel, ensuring durability and performance under heavy use.
