

25M 30M Excavator Telescopic Dipper Arm with 1.5CBM Clamshell Bucket

Our Product Introduction

for more products please visit us on excavatorlongarm.com

Basic Information

- Place of Origin: Guangdong Province, China
- Brand Name: Kaiping Zhonghe Machinery Manufacturing Co. Ltd
- Certification: CE, Patents, ISO9001
- Model Number: SSB009
- Minimum Order Quantity: 1 Set / Piece
- Price: USD 199.00-USD8999.00
- Packaging Details: Bubble / Wooden Cases / Others as you request
- Delivery Time: 5-20/works
- Payment Terms: T/T, L/C
- Supply Ability: 5 Sets Per Week

Product Specification

- Material: BS900E
- Wire Rope: High Strength Wire Rope
- Digging Depth: 25m - 32m
- Clamshell Bucket Size: 1CBM 1.5CBM 2CBM 3CBM
- Suitable Excavator Model: 10 Ton- 65 Ton Excavator
- Application: Digging House Foundation Pits, Construction Work

Product Description

Overview of One Set of Telescopic Dipper Arm

Zhonghe Machinery proudly presents the state-of-the-art 25M/30M Excavator Telescopic Dipper Arm with a robust 1.5CBM Clamshell Bucket. Designed with precision engineering and fabricated from high-quality materials, this excavator arm and boom setup exemplifies durability and efficiency, making it ideal for various heavy-duty applications including excavation, construction, and landscaping.

Exceptional Quality and Certification

At Zhonghe Machinery, we believe that quality is paramount. Our Telescopic Dipper Arm is manufactured under stringent quality control measures and is certified to meet international standards. We hold ISO 9001 certification, ensuring that our production processes adhere to the highest criteria for quality management. Additionally, our equipment has passed numerous safety tests, providing assurance that they are safe and reliable for operators.

4. Certifications

Advanced Design Features of Excavator Telescopic Arm

The 25M/30M Telescopic Dipper Arm showcases an innovative design that allows for extended reach and enhanced versatility on job sites. The telescopic feature enables operators to adjust the length of the arm quickly, accommodating various working conditions and improving overall productivity. The clamshell bucket, designed with a capacity of 1.5CBM, ensures efficient material handling, whether for digging, scooping, or transporting loose materials like soil or gravel.

Four pulley design

There are two sliding wheels on the top and two on the bottom, which separate the high-pressure hose and the wire rope to reduce mutual wear. Less wear can extend the service life.

Adopt 30mm main rope

We use thicker wire ropes, which can withstand greater tension, are not easy to break, and withstand greater pressure. The wire ropes are highly wear-resistant and have a long service life.

26mm auxiliary wire rope

Here is the auxiliary wire rope, which is used to make the telescopic arm retractable when it is extended horizontally.

Ningbo connector

It is made of metal and has high compression resistance and expansion capacity. It is easy to load and unload, and can be loaded and unloaded freely.

High Quality----Nylon Sliders

Siding block, it is nylon material, it can reduce grinding
Our sliding wheel is POM Material, with high mechanical strength and rigidity

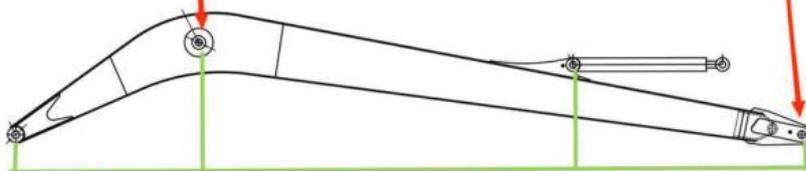

lubrication concentrate system

Many holes, many holes on the top and at the side, it is easy and convenient for the operator to refill the lubrication oil, they all concentrate on the font of arm.

Double-sided boring lathe

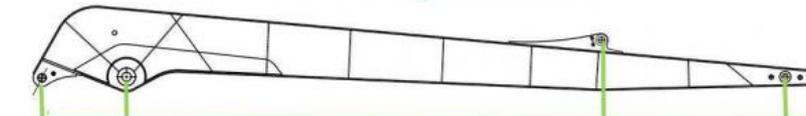

After the excavator boom and arm are assembled, the pins on the boom are drilled to ensure that the pins on the boom are parallel to each other and the cross section of the pin hole is perpendicular to the pin. The double-sided boring machine of the boom makes the hole position more accurate and the quality higher.

Make sure the cross section of the pin hole is perpendicular to the shaft.

Make sure the axis is parallel to the axis

Make sure the cross section of the pin hole is perpendicular to the shaft

Make sure the axis is parallel to the axis

Durability and Maintenance

Built to withstand the rigors of demanding work environments, the Telescopic Dipper Arm features high-strength steel construction that resists wear and tear. Regular maintenance is hassle-free, thanks to the accessible design and readily available replacement parts. Zhonghe Machinery stands behind the longevity of its products with a comprehensive warranty,

ensuring that our customers can rely on their equipment for years to come.

Customer-Centric Service

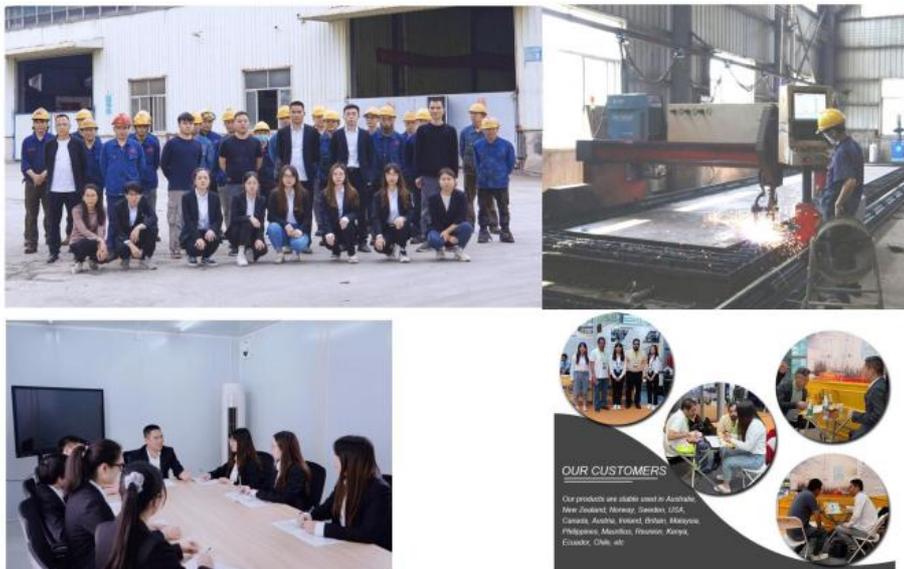

Zhonghe Machinery is dedicated to providing exceptional customer support. Our team of experts is available to assist with technical inquiries, training, and after-sales services. We work closely with our clients to ensure that they achieve maximum performance from their equipment. Our commitment to customer satisfaction extends beyond the sale; we aim to build long-lasting partnerships with our clients.
